

Council Corner

Council honours Department of Operations for unheralded service

The Department of Operations plays an integral role in the management, maintenance, and success of the Town of Tofield.

In many communities these duties are referred to under the umbrella of Public Works, however, in Tofield all departments fall under the scope of Operations.

This department is responsible for an infrastructure of services in transportation, water, wastewater, solid waste and storm water management, public buildings and spaces, parks and grounds maintenance, snow removal, road maintenance and many other countless tasks throughout the community.

These operations professionals focus on infrastructure, facili-

ties, services, and components which are vital to the community's success to be being a resilient community and providing a high quality of life and well-being for the people of Tofield.

Truly, these services could not be provided to the community without the dedicated efforts of these "Public Works" professionals who are each responsible for rebuilding, improving, and protecting our community's transportation, water supply, wastewater system to name but a few.

Recently, Mayor and Council were contacted by the Alberta Public Works Association (APWA). The APWA, Alberta Chapter was seeking support to recognize and promote National Public Works Week. The APWA, is looking to acknowledge these hard-working individuals both province wide, and nationwide from May 15-21, 2022. Mayor and Council were quick to provide a unanimous motion of support in declaring May 15- 21, 2022 National Public Works Week.

Mayor and Council furthered

comment to add the exceptional quality of service that we as a community are provided, by these hard-working individuals. Without the thankless services of these people, our community would not thrive in the capacity it does.

On behalf of Council, we thank each of you for your efforts, and thank you for making Tofield a better place to live.

*Respectfully submitted,
Mayor and Council*
